

The RUN team would like thank all its friends and supporters

Towards the end of the year the team behind the RUN project would like to report on some major activities in 2017.

The RUN team welcomes new collection points

The goal of the RUN project is the collection, quality-controlled refurbishment and remarketing of notebooks from private households.

To facilitate this, the RUN project offers the free-of-charge send-in of notebooks in Germany. Free shipping labels can be created on the RUN website: https://return.reuse-notebook.com/

Next to this notebook can also be handed over at collection points in Germany and Austria. The RUN team is happy to welcome new partner who act as collection points:

- Musikschule Musikus
- <u>Abfallwirtschaft Osterholz-Scharmbeck</u>
- ITCONET
- <u>Computer Mack</u>

All available collection points in Germany can be found on the website:

http://reuse-notebook.com/de/service/sammelpunkte/

In Vienna, notebooks can be handed over to all locations of the "Wiener Volkshochschulen". More information about collection points as well as about the realisation of the project in Vienna can be found here:

http://www.vhs.at/nettbooks.html

Public relations work

To increase awareness of the RUN project, the RUN team has again set up and realized various advertising and public relations measures.

For example, the team presented the RUN project at the following most recent, supraregional events:

- FAIR FRIENDS Consumer fair for a sustainable consumption, fair trade and social responsibility 7. 10.9.17
- Waste-to-Resources 2017, 7. International Congress MBA, Sorting and Recycling, 16. 18. Mai 2017, Hannover

Information about upcoming and past events is also available on the RUN website: <u>http://reuse-notebook.com/de/service/termine</u>

A new nationwide call for donations of notebooks is implemented in cooperation with iFixit Europe:

https://eustore.ifixit.com/kreislauf/

The collection campaign runs during the pre-christmas season. Customers are given the opportunity to donate their devices for reuse for the protection of the environment.

The RUN team would like to take this opportunity to extend warm thanks to the partner iFixit for the good cooperation.

ReUse Notebook (RUN) Das RUN Projekt macht die in Notebooks und Tablets enthaltenen Ressourcen wieder nutzbar, indem es eingesandte Geräte aufarbeitet und die auf dem Rechner vorhandenen Daten in einem zertifizierten Prozess sicher löscht. So wird es leicht, etwas für die Umwelt zu tun und ausgemusterten Computern ein zweites Leben zu geben.		AfB Social & Green IT AfB (Arbeit für Menschen mit Behinderung) übernimmt ausgemusterte Mobilelektronik, löscht die Daten zertifiziert und bereitet die Geräte dann für die Wiederverwendung auf. Durch diesen Prozess werden natürliche Ressourcen geschont und Emissionen reduziert.

Together with you, we would like to continue to "save" as many notebooks as possible from reaching their end-of-life much too soon. The RUN team looks forward to our continued partnership and cooperation.

The RUN project received funding from the European Community's Seventh Framework Programme (FP7/2007–2013), Eco-Innovation Call under grant agreement No. 630329. For more information please visit http://www.run-project.eu

Co-funded by the Eco-innovation Initiative of the European Union
